

DAVID STEPHENS LEED AP

SENIOR CONSULTANT - VP

My focus is always on the team. I enjoy the interactions that result in great projects.

I grew up in the theatre, then spent 18 years with Disney, first as a technician for shows then on the overall development of facilities. I joined the team that became Idibri to launch their theatre design group in 2000 where my work centers on spaces where people come together to share an experience.
