

JENNIFER HU CTS-D

CONSULTANT

It is important to me to do things well.

I enjoy solving problems and developing solutions--especially when those skills are engaged as part of a team. My engineering training equips me to craft designs that have impact for the client, and my project experience covers an array of venues including theatres, high-end operations centers, sports venues, university campuses and other project types where connection and communication are at the center of the mission.

Christ Cathedral
Garden Grove, CA USA
