

BROADWAY THEATRE

COTAI, MACAU

SCOPE

- Acoustics
- Audio
- Lighting
- Theatre Planning
- Theatrical Equipment
- Video

CLIENT

Galaxy Entertainment Group

Premier live entertainment auditorium for international concerts, esports, and events.

Broadway Theatre is the premier live entertainment venue at Galaxy Macau, a luxury destination resort located in the Cotai Strip. The 3,000-seat theatre was an adaptive reuse of an existing space with approximately 18 months from design concept to opening. The goal was to provide a venue for a variety of live events including concerts, shows, and conventions—including Galaxy Macau’s China eSports in 2017.

Idibri’s task was to design a theatre that fit within the constraints of the existing structure yet provided an experience for both artists and patrons that met Galaxy’s high standards. In order to accommodate the technical demands of large productions, a structural space frame was added over the stage that provides 70,000kg of rigging capacity. We provided acoustics, audio, video, lighting, and theatrical equipment design to support the theatre’s ability to be reconfigured based on the requirements of each event.
